# Onity

Onity access management systems are the solution to improve key management and increase security in your facility, while lowering costs and enhancing efficiency.

## Key Management
Managing thousands of keys and master keys that access different doors in different buildings is complicated. Add in lost, copied and stolen keys, and it's impossible. Onity takes the hassles out of managing your keying system. Just point and click, and you decide who can go where and when.

## Improved Security
A facility secured with electronic locks enhances force protection for personnel, privacy, and assets. Onity helps you prevent incidents and reduce attrition by controlling access and providing tools to resolve issues immediately.

## Cost Savings
Purchasing new cylinders and changing the master key system because a key or master key is lost, stolen or duplicated adds up quickly. With Onity electronic locking systems you will never need to do this again. You save time, money and staff.

## Dedication and Reliability
Onity combines the most reliable technology, with over twenty years of experience, to provide the most advanced electronic locking systems in the industry today. We have a dedicated team of specialists who understand the unique issues facing military and government facilities.

# Onity Integra3 System

Onity solutions are currently used on over 120 bases, representing all branches of the military, and countless government buildings.

## Features

☐ Designed for any facility size

☐ Supports mag-stripe and Smart card technologies

☐ Can incorporate facility ID cards

☐ PC based; Windows® compatible

☐ User friendly: easy to learn, easy to use

☐ Enables a flexible integration of on-line elements into the off-line system

☐ Manages up to 65,000 users and 65,000 doors

☐ Capacity of up to 3,000 users per stand-alone lock

☐ Allows for individually customized access privileges

☐ Lock audit trail of up to the last 1,184 events (openings and rejections)

☐ Provides entry activity reports by date, time, user...

☐ Remote modem access to the on-line devices through standard telephone line

☐ Locking plan matrix for a complete visual representation of your locking plan

## Options

☐ Integra3 Smart

☐ Keypad

☐ Emergency Key Override

☐ Kiosk

This comprehensive lock management system offers the advantage of combining off-line (stand alone) and on-line devices, which results in a single integrated system.

The Integra3 flexible system can work together with other technologies such as proximity readers, CCTV, alarm systems and presence controls.

The Windows® based, easy to use software can be custom designed to meet specific needs.

# Onity HT Series

## HT24W

Crafted for any property size, this Windows® based solution helps your staff perform at optimum efficiency. The intuitive user-friendly design makes it easy to learn and use.

The Onity HT24w system is the most advanced system based on magnetic-stripe technology.

## HT24W System Features

☐ PC based system; Windows® compatible

☐ User friendly: easy to learn, easy to use

☐ PMS & POS Interface

☐ TCP/IP Interface

☐ Allows Multi-Front-Desk configuration:
   - links as many check-in terminals as needed without requiring additional PCs

☐ Exclusive OmniMaster Master-keying System:
   - up to 5,000 master cards identified by user name

☐ Provides staff shift time-tables

☐ Capability to control full range of Onity options:
   - in-room safes, on-line and off-line card readers, card identifiers, energy management systems

☐ Works with the full variety of Onity stand-alone locks

☐ Lock audit of the last 100 transactions

## HT22

Perfect for small to medium sized properties, this solution includes a direct Property Management System interface without requiring a PC.

## HT28 Smart

Designed for multi-applications, this solution is the closest stand-alone lock to an on-line locking system.

# Access Management Options

Designed to withstand extreme environmental conditions, Onity's All-Weather Lock is resistant to the humidity and salinity of coastal environments, as well as sand, dust, heat, cold, rain and snow.

Note:
Standard with Integra Locks
Optional with HT Locks

ADA Compliant

## Levers and Knobs

Onity locks come standard with the Toledo lever with a 1/2" return. The remaining samples shown are available by special order.
*Note: Some state fire codes require that lever handles installed on corridor doors must return to within 1/2" of the door surface. Sevilla and Knob are not available in all finishes.

| Toledo* | Granada | Jerez | Barcelona | Sevilla* | Knob* |

## Finishes

Complement your Onity lock with any of these wear resistant finishes.

| Satin Brass | Satin Chrome | Antique Brass | Polished Brass | Polished Chrome | Dark Bronze Powder Coat | Satin Nickel | Black Powder Coat |

## Latch Mechanisms

Options include extra-long high security deadbolt, security deadlatch, and privacy and anti-panic functions.
*Note: Mortise locks built to ANSI Grade 1 specifications.
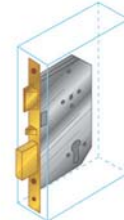

| Cylindrical | Mortise* Latch Only | Mortise* with Deadbolt | Mortise* with AutoDeadbolt | EURO | DIN with AutoDeadbolt | Tubular | Interconnected |
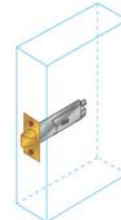

# Electronic In-room Safes

## Features

- User Friendly
- ADA Compliant
- Insertion-protected Door
- "Code to Close" Technology
- Shut Down Mode
- 2 Solid Steel Bolts
- 4 AA Batteries - Easily Accessible
- Replaceable Mechanism
- "Non-resident" Master Code
- Portable Programmer
- Anti-Theft Labyrinth Mechanism
- Anti-Drill Rotating Bolts
- 6 Sizes Available
- 2 Finishes Available

Designed with security, ease of use, and convenience in mind, Onity In-room Safes are ideal for offices, barracks, BEQs, BOQs, and base hotels.

Give your personnel and visitors the peace of mind that comes from knowing their personal belongings and equipment are securely stored.

# Energy Management Systems

First Year Monthly Savings

Monthly Savings $/€

## Benefits

☐ 25-35% Average Energy Savings
☐ Meets Federal Mandates
☐ Reduces Maintenance Costs
☐ Extends Equipment Life
☐ Direct Digital Temperature Control Within 1 Degree Accuracy
☐ Automatic Control Modes
☐ Easy Installation and Replacement
☐ Flash Memory Prevents Obsolescence

Onity is the EMS provider to help you reach your Federal Energy Management Program goals.

Onity's consultative approach means that our energy experts can assist you to define, develop, and maintain the perfect energy management system for your installation.

Our products merge digital temperature control with passive infrared (PIR) occupancy sensing, and HVAC (Heating Ventilation Air Conditioning) Setback strategies (temperature adjustment to energy efficient levels when a room is unoccupied) to create the latest energy management technology in the industry today. Onity / Senercomm® products work with all types of HVAC configurations and light control.

We can help you reduce the environmental impact of excessive energy use while maintaining quality of life for your personnel.
